

Exhaust Equipment

EXHAUST FANS

Car-Mon exhaust fans are built with the extra margin of durability necessary for reliable performance in critical or hazardous applications. Whether you need a belt drive, direct drive, inline or special purpose fan, Car-Mon can build the fan to suit your exhaust application.

EXHAUST ARMS AND FUME EXHAUST EQUIPMENT

Our Series WX and WXH Exhaust arms have standard lengths from 3' to 15' and 4" thru 8" diameters. Custom lengths and diameters are available.

Fume hoods with vertical hood design as well as special purpose hoods are designed to capture fumes at the source. Welding tables are also available.

UNDERFLOOR UNITS

Disappearing and non-disappearing underfloor units are available in 4" to 6" diameters. Special sizes and configurations are also available.

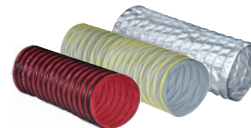

EXHAUST EQUIPMENT FOR OVERHEAD APPLICATIONS

Car-Mon manufactures both portable and stationary filter units capable of filtering smoke and other particulates from the air with standard 95% or HEPA filters.

FLEXIBLE HOSE

Car-Mon offers a wide variety of hose types for many different types of applications including car and truck exhaust, welding fumes, and laboratory or chemical applications.

Car-Mon manufactures systems for all of your overhead exhaust needs including hose reels, pipe booms, articulated arms, down drops, and a wide variety of retraction equipment. We are specialists in designing equipment for custom applications.

EXHAUST ADAPTERS

Car-Mon has an exhaust adapter for all types of vehicles. If you have a special vehicle or application, we will design an adapter to fit your needs. Custom adapters available.

All Car-Mon equipment is performance guaranteed. Our rugged quality construction is the result of thorough component system engineering based on over six decades of pollution control experience. In addition to our extensive line of standard products, our nationwide network of representatives is on hand to provide engineering services including system design, equipment selection and pricing. Car-Mon also provides free system design from our factory engineers. Consult our general catalog, or go online to www.car-mon.com for additional information, detailed drawings and specification data on our entire line of quality exhaust system components. A listing of local representatives can also be found on the website. For a free engineering CD containing our complete catalog and many extras, send an e-mail request to: info@car-mon.com with "engineering CD" in the subject line.
