Car-Mon series TSR-P is a hose storage reel designed for use with Car-Mon hose of specified length and diameter. Its frame is of welded construction using square tubular steel with 12 gauge end plates and an airtight rotating cylinder with a recessed inlet fitting to which the flange mounted flexible hose will be bolted. The assembly is driven by a motor with sprocket and chain drive. A remote mounted push button station for up/down control is included. Reel motor voltage is 115, single phase standard. Optional voltage and control configuration available. Explosion resistant and special purpose reels are available, consult factory.

Note: Factory reserves the right to change dimensional data without notice.
